

Premium Quality Business Broadband

iNet
INTELLIGENT NETWORKS

Corporate Lite Broadband

Up to 8 Mbps download, Up to 1Mbps Upload

Overview

Corporate Lite is the right choice for small businesses requiring high performance, robust business strength broadband.

Features

Lite broadband includes some impressive added benefits such as e-mail with full anti-spam and anti-virus controls. This protects you from unwanted inbound e-mails and against viruses.

The package also gives 100Mb of non-commercial web-space. Lite also includes free setup and unlimited transfer allowance (subject to fair use policy).

Support

First class support is all part of the service. Our broadband packages include dedicated online technical support from Digitel, should the unexpected arise.

Technology

ADSL 2+ is the product of improved technology. It provides a more consistent platform for broadband and for most, an increase in download speed by doubling the frequency band used.

Our broadband packages which feature the 2+ symbol enjoy speed boosts where the exchange technology permits.

Optional Hosted/Managed Services

Hosted Services are provided from our central servers, removing the need for you to maintain them.

- ✓ Hosted e-mail service.
- ✓ Shared calendar
- ✓ Mobile e-mail
- ✓ Virtual Private Network
